

British Informatics Olympiad Final

12 – 14 April, 2002

Sponsored by Lionhead Studios

Humour

How would you go about getting a computer to automatically produce humour? You are free to mention anything you feel would be relevant, such as the feasibility and limitations of such a system, how it might be trained, how such a system could be tested, problems that might arise and how you would solve them, algorithms and time/space considerations.
